

It's Wonderful to be in the Neighborhood!!

Maybe you've seen our trucks at your neighbor's house completing another painting project.

Hopefully you took note of the standards of quality and attention to detail that we bring to every job.

Our company always shows up in a lettered company van with a workforce identified by company shirts and painters' pants. While the clothes don't make the person, you won't find us hiring day labor working out of pick up trucks.

Since 1977 we have always protected ourselves, our employees and our customers by adhering to all licensing regulations, full liability and worker compensation insurance. We contribute to local, state and federal economies by paying all applicable taxes. It's not fun but we do it because its right and it is the law. We believe following all the rules has blessed us to be able to serve your community for over thirty years.

Our "Buy The Hour" program allows you to completely control the cost of all projects. No job is too small or too large. A good faith estimate based on vast years of experience helps you decide what you want to pay for.

Check out our website online or call to talk to Kim. Our program is different, helpful and successful to all who want to 'get what they pay for.' Remember, you're the boss; we work for you or we don't work.

May 2008
